

Víctor Marrero Carrillo

I specialize in managing the entire lifecycle of projects—from analysis, documentation, and development to problem-solving. In addition to my professional work, I also manage independent projects, which allow me to continuously learn and refine my skills across various technologies and frameworks.

Experience

Analyst Programmer at Bitbox (IKEA)

Dec 2023 - Present · Santa Cruz de Tenerife - IKEA

- React Native developer, responsible for analysis, development, and maintenance applications, working within the Warehouse project ecosystem.
- Implemented and managed a custom OTA (Over-the-Air) update system using Expo Updates, optimizing the app distribution process.
- Collaborated in teams using Git and Subversion, developing with technologies such as Java, JavaScript, React, React Native, and Spring Boot.
- I have also made modifications to the libraries and gone through the entire development process: analysis, documentation, development, and troubleshooting.

Full Stack Developer at Ashotel

Marz 2023 - May 2023 · Santa Cruz de Tenerife - Hotel Association

- Development and updating of WordPress websites with a PHP backend to enhance the user experience.
- Task automation to enhance my colleagues' productivity using TypeScript to create automations in Excel and Microsoft Power Automate, with the goal of streamlining internal processes.
- Assuming the role of a leader during the development of a Minimum Viable Product (MVP) in Power Apps, with the objective of optimizing tasks and increasing operational efficiency within the company.

Mobile Developer at Centro de Informática y Análisis de Canarias SL

Marz 2022 - May 2022 · Santa Cruz de Tenerife - Consulting

- Optimizing the speed and efficiency of dropdown lists in our application using loading techniques, lazy loading and caching.
- Assuming a leadership role in the successful creation of a new section of the application, introducing new features to it.
